TVH HISTORY

Dear customer,

More than 45 years ago, in 1969, the success story of TVH began. Mr Paul Vanhalst and Mr Paul Thermote, neighbours and school friends, joined forces and started with the purchase and repair of agricultural machines and used lift trucks.

Increasing industrialisation led to a growing need for lift trucks and lift truck parts. Slowly but surely, TVH was growing into a global player, thanks to the success of the product and customer service, but also thanks to acquisitions.

After all these years, the business is still in family hands and has grown from 2 founders, to a workforce of almost 4000 employees worldwide, in 5 continents. The day-to-day management has now been handed over to the second generation.

TVH has two business units: Parts & Accessories (TVH Parts NV) and Equipment (TVH Equipment NV). TVH Equipment is a specialist in second-hand lift trucks and aerial work platforms.

TVH Parts is your all-round supplier of quality parts and accessories for material handling, industrial vehicles and agricultural equipment.

You get fast answers on any offer, order or technical question from our dedicated sales and technical departments. We continually expand our product range by following new trends and looking for new partnerships, to make sure you will find absolutely everything you need right here at TVH.

ELECTRONIC PARTS

Our range includes printed circuit boards, electronic speed controllers, displays, chargers, contactors, joysticks, accelerators and directional switches.

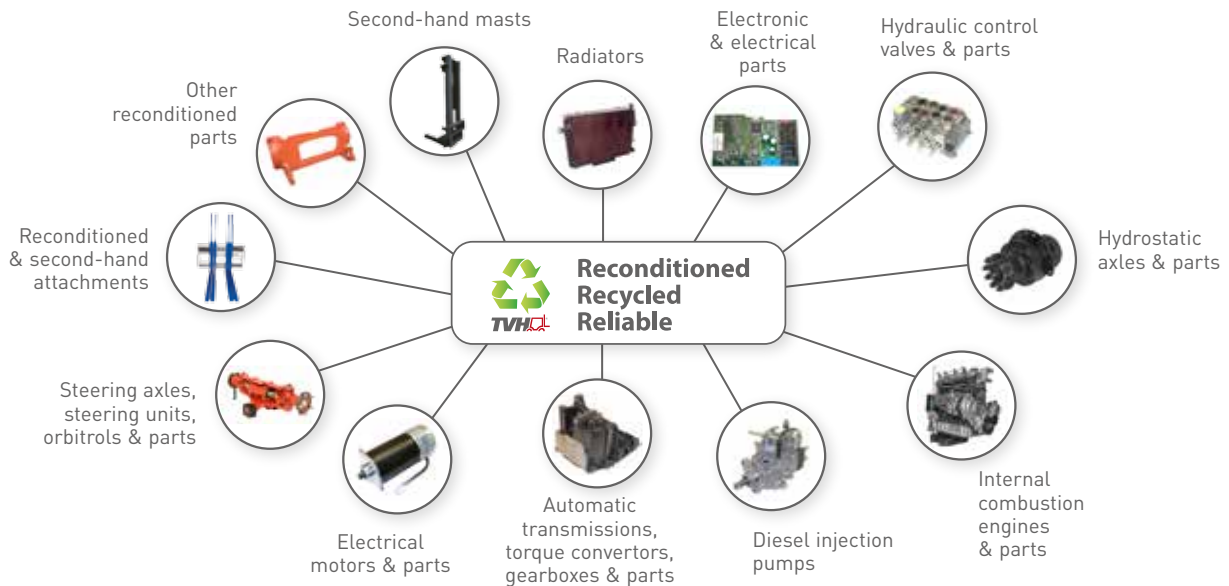

Our electronics department is Europe's largest, best equipped and most diverse service centre for the repair of electronic parts for forklifts, aerial work platforms and industrial vehicles.

Find out more about our electronics department in our brochure (REF 20207048) or go to downloads on www.tvh.com to watch the movie.

RECONDITIONED PARTS

We offer you a unique range of reconditioned parts, at the best price. Reconditioned parts are sold with the same warranty as for a new part, at a price that can be up to 50% cheaper!

Electric motors, internal combustion engines, print-boards, hydraulic pumps, transmissions, torque converters, radiators, steering axles, starters, alternators ... everything is in stock! TVH has invested in a wide range of test devices which allow us to pass stringent quality controls on various spare parts. The tests are designed in such a manner that a realistic work situation is generated during the tests.

Buying one of our reconditioned parts is the perfect alternative to buying a new spare part. Ask for the availability and the conditions! You can buy a reconditioned part with or without the return of an old unit (service exchange parts).

Find out more about our reconditioned parts in our brochure (REF 29127412) or go to downloads on www.tvh.com to watch the movie.

Seats

- **Switch (OPS):**

Operator Presence Switch

- **Seat ergonomics:**

One of the most important aspects to consider when buying a seat is the ergonomics. After all, replacing an employee due to physical problems is much harder and more expensive than replacing a seat.

One simple rule to keep in mind if you want to preserve the ergonomics of the original machine, is to replace the broken seat with a 100% equivalent aftermarket alternative. If this is not possible due to unavailability or price, TVH can provide a seat that offers equal economic advantages either via MyPartsFinder or via other media.

One of the most important features is the seat height (seating position). If a seat is too high it will be uncomfortable, too low is hardly even a problem, so we recommend you a seat that has approximately the same sitting height as your old seat.

Old and new fabric

- New Fabric: Blue/black matrix fabric (1) (MH)
- New fabric: Yellow – black (2) (CE)
- Old fabric: Black/grey matrix fabric (3) (CE)

NICE TO KNOW

- **Not available:** this seat can't be sourced and isn't available (anywhere)
- **On request:** if explicitly requested, we can assemble this part for you
- **NLA:** No longer available

- **General REF:** this reference is suitable for both the PVC and the Fabric version of the seat.

Seat belts

- **ALR seat belt:**

Automatic Locking Retractors lock when the lap belt is put around the wearer.

ECE R16 technical definition:

A retractor allowing extraction of the strap to the desired length and which, when the buckle is fastened, automatically adjusts the strap to the wearer. Further extraction of the strap is prevented without voluntary intervention by the wearer.

- **MUR seat belt:**

Manual Unlocking Retractors unlock when the lever is operated.
When in use, this acts as a static seat belt.

- **ELR seat belt:**

Emergency Locking Retractors lock in case of:

- a) webbing acceleration: retractor will lock if the webbing is snatched (Typically abrupt torso movement)
- b) vehicle movement: retractor will lock with sudden vehicle movement (Typically abrupt stopping, vibration or roll-over)

Must be mounted correctly in order to function

c) **ECE R16 technical definition:**

A retractor which - during normal driving conditions - does not restrict the freedom of movement by the wearer of the safety-belt. Such a device has length adjusting components which automatically adjust the strap to the wearer and a locking mechanism actuated in an emergency

MyTotalSource

Your interactive online webshop for spare parts

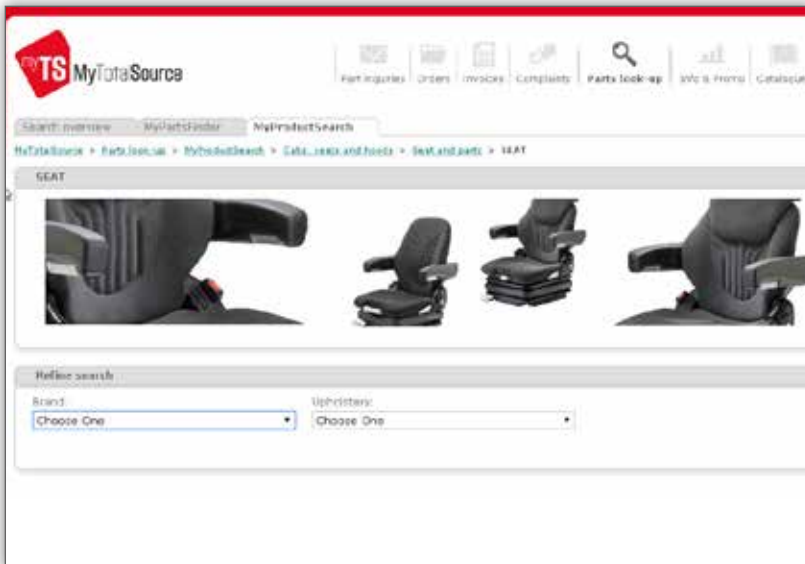

The user-friendly search modules **MyPartsFinder** and **MyProductSearch** allow you to always find the correct part. Alternatively, you can also easily search by partnumber.

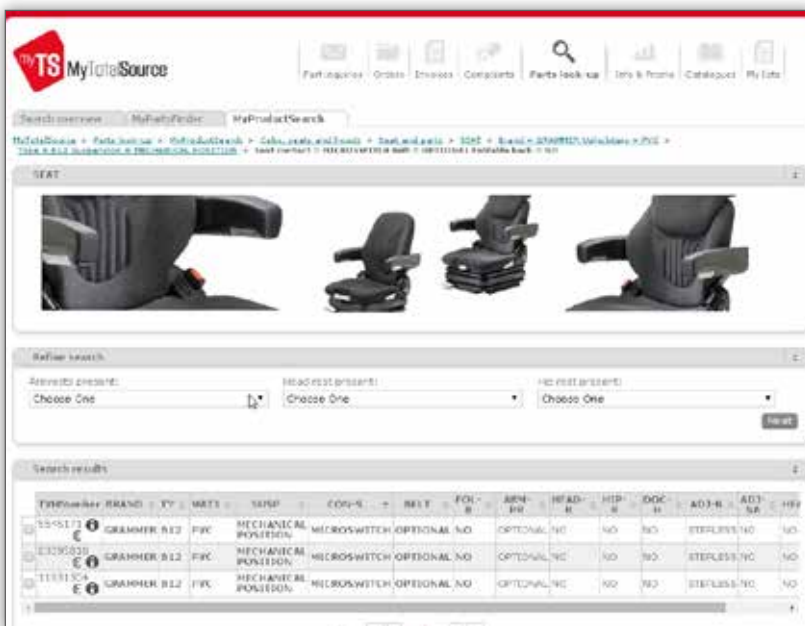

1) In **MyPartsFinder** you can find your parts by entering vehicle specifications. (brand, type ...)

2) With **MyProductSearch** you can find your part by entering technical details.

MyProductSearch
Find your consumables group

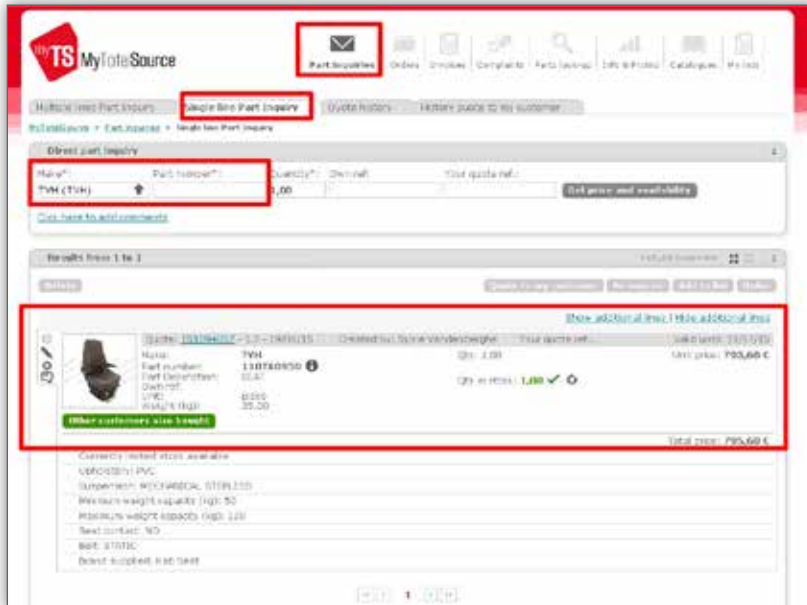

It is also possible to search further via MPS (MyProductSearch) for a similar part with other characteristics if necessary, or the parts can also be compared to each other.

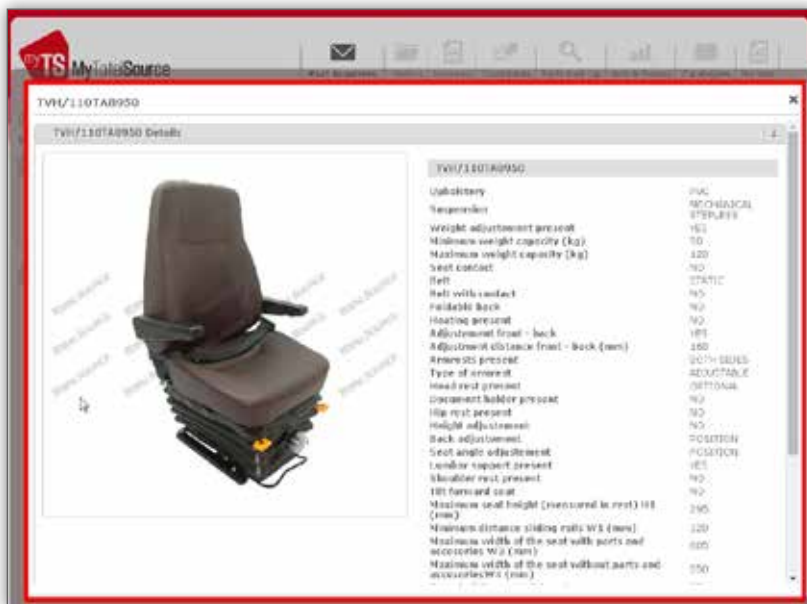

NICE TO KNOW

3) Search by partnumber

- **Single line part inquiry:** for a quick price and lead time of only 1 item
- **Multiple line part inquiry:** for price and lead time of several parts
- Instant price, availability and picture

The references in the catalogue only contain the most important info, but once the ref is entered via MTS, then extra info can be consulted such as:

- Extra technical info
- Larger (and more specific) photographs

2. With safety belt engaged around wearer, EZE retractor webbing stays taut and does not obstruct whilst manoeuvring the vehicle.

SPRINGBELT

REF 151TA2268 – Springbelt ALR orange electric

REF 151TA2269 – Springbelt ELR orange electric

Springbelt is a remarkable product that has been refined and developed over many years to protect both employees and employers. It's called Springbelt, because as you can see, it springs up when unbuckled making it a real nuisance and cannot be sat on as per a normal belt/buckle. When it's buckled, it holds the operator firmly, comfortably and safely in their seat. It can be fitted easily to all common types of mobile machinery providing highly visible workplace protection for you and your operators.
